Profile Summary

Senior DevOps Engineer with 7+ years of experience in Azure Cloud, AWS, Kubernetes, Terraform, CI/CD Automation, Infrastructure Optimization, and DevSecOps practices. Proven expertise in designing scalable cloud platforms, automating deployments, managing production operations, and driving cloud modernization and cost optimization initiatives. Skilled in Azure, AWS, AKS, Terraform, Datadog, GitHub Actions, Azure DevOps, and cloud-native engineering practices. Actively leveraging Generative AI tools including Claude Code and CursorAI to accelerate DevOps workflows, infrastructure automation, and pipeline development.

Key Achievements

- Contributed to approximately \$5M cloud infrastructure cost optimization initiatives across Azure environments.
- Reduced deployment timelines by up to 50% through Terraform, AKS, CI/CD automation, and cloud modernization initiatives.
- Implemented DevSecOps and observability practices improving deployment reliability, monitoring, and operational visibility.
- Leveraged Generative AI tools (Claude Code, CursorAI) to accelerate Terraform scripting, pipeline debugging, and infrastructure code reviews, significantly reducing manual effort.
- Managed AWS cloud infrastructure (EC2, ECS, S3, RDS) at Deutsche Bank, supporting productiongrade application deployments and operational stability.

Technical Skills

- **Cloud Platforms:** Azure (AKS, ADF, VMSS, Azure Functions, VMs, Storage, Networking), AWS (EC2, ECS, S3, RDS, IAM)
- **CI/CD & DevOps Tools:** Azure DevOps, GitHub Actions, Jenkins, GitLab CI/CD
- **Containerization & Orchestration:** Docker, Kubernetes, AKS, Docker Swarm
- **Infrastructure as Code & Configuration Management:** Terraform, ARM Templates, Ansible
- **Programming & Automation:** Python, PowerShell, Bash/Shell Scripting
- **Monitoring & Observability:** Datadog, Grafana, PagerDuty
- **Security & DevSecOps:** GitHub Advanced Security (GH-300), SonarQube, OWASP ZAP, CodeQL, Dependabot, IAM, RBAC
- **Cloud Cost Optimization / FinOps:** Azure Cost Management, Rightsizing, Resource Optimization, Governance
- **Build, Application & Web Servers:** Maven, Node.js, IIS, Nginx • **Version Control & Artifact Management:** Git, GitHub, Azure Repos, GitLab
- **Operating Systems:** Linux, Windows Server
- **Project & Collaboration Tools:** Jira, ClickUp, Azure DevOps
- **AI / GenAI & Emerging Technologies:** Claude AI, Claude Code, CursorAI, Prompt Engineering, Generative AI, LLM-assisted Automation, AI-900

Certifications

- Microsoft Azure AI Fundamentals (AI-900) – Microsoft
- GitHub Advanced Security (GH-300) – GitHub
- Claude Code – Anthropic

- CursorAI
- Microsoft Azure Administrator (AZ-104) – Pursuing

Professional Experience

Senior DevOps Engineer

WinWire Technologies India Pvt. Ltd., Hyderabad

May 2025 – Present

- Managing DevOps operations for a retail application running across hybrid on-premises and Azure cloud environments.
- Managing Azure infrastructure using Terraform, AKS, VMSS, and cloud-native Azure services to support scalable production workloads.
- Building and maintaining CI/CD pipelines using GitLab CI/CD and Azure DevOps for application, infrastructure, and deployment automation.
- Implementing automation and configuration management using Ansible, PowerShell, and scripting for application and infrastructure operations.
- Leveraging Claude Code and CursorAI (Generative AI tools) to accelerate Terraform script generation, pipeline debugging, and infrastructure code reviews.
- Supporting WinWire's Agentic AI and Generative AI transformation initiatives by provisioning and managing Azure OpenAI-ready cloud infrastructure, ensuring scalable, secure, and compliant environments for AI workloads.
- Collaborated with AI and data engineering teams to set up Azure infrastructure supporting GenAI application deployments, including compute, networking, storage, and identity configurations aligned with AI project requirements.
- Automated deployment pipelines for GenAI and LLM-based application workloads using Azure DevOps and GitLab CI/CD, improving delivery speed and consistency for AI-driven product releases.
- Configured Datadog dashboards, monitors, and alerts improving observability, incident response, and production visibility across Azure environments.
- Led cloud cost optimization initiatives across Azure environments, contributing to approximately \$5M in infrastructure cost savings through resource cleanup, storage optimization, rightsizing, governance improvements, and infrastructure rationalization.
- Identified and optimized underutilized cloud resources including idle VMs, unattached disks, stale snapshots, old image versions, unused storage accounts, and non-production assets.
- Improved infrastructure reliability, operational efficiency, and deployment consistency through DevOps best practices, monitoring, automation, and governance controls.

DevOps Engineer (L2)

HealthWorksAI (Teg Analytics), Bengaluru

August 2022 – April 2025

- Automated Azure infrastructure provisioning using Terraform, reducing deployment time by 30% and improving environment consistency across multiple deployments.
- Designed, implemented, and maintained CI/CD pipelines using Azure DevOps, increasing deployment frequency by 40% while reducing manual intervention.
- Migrated legacy on-premises applications to Azure Kubernetes Service (AKS), improving scalability, deployment reliability, and reducing operational costs by 20%.
- Developed Python and PowerShell automation scripts for infrastructure provisioning, monitoring, operational tasks, and deployment workflows.
- Containerized Node.js and Angular applications using Docker, improving application portability, scalability, and environment consistency.

- Led DevSecOps initiatives by integrating security and vulnerability scanning into CI/CD pipelines using OWASP ZAP, SonarQube, CodeQL, and security best practices.
- Monitored, optimized, and maintained production Kubernetes clusters using Grafana and observability practices, improving uptime, performance, and operational visibility.

Associate Software Engineer

Deutsche Bank (Adecco), Bengaluru

November 2020 – August 2022

- Designed and maintained automated CI/CD pipelines using Azure DevOps, reducing deployment errors and enhancing the release process.
- Developed and maintained Ansible playbooks for configuration management, improving infrastructure consistency across environments.
- Hosted and managed applications on AWS ECS using Docker Swarm for container orchestration across cloud environments.
- Managed AWS cloud infrastructure using EC2, S3, and RDS to support application deployment, operational stability, and production workloads.
- Collaborated with cross-functional teams to ensure reliable, scalable AWS deployments aligned with enterprise security and compliance standards.

SAP Archiving Specialist

Meera Tech Solutions, Hyderabad

November 2018 – October 2020

- Managed SAP data archiving activities to optimize database size, system performance, and operational efficiency.
- Collaborated with SAP Basis and functional teams to maintain data lifecycle management and system stability.
- Ensured compliance with enterprise data retention, audit, and regulatory requirements.
- Monitored, validated, and troubleshoot archiving jobs while maintaining documentation and reporting.

Key Projects Healthworks AI Project

- Provisioned Azure infrastructure using Terraform, streamlining environment setup and reducing deployment time by 50%.
- Deployed Node.js and Angular applications on Kubernetes clusters, enabling seamless scaling and load balancing.
- Monitored and managed production systems, ensuring 99.9% uptime and rapid incident resolution for business continuity.

Azure Data Factory CI/CD Pipeline

- Created CI/CD pipelines to automate the deployment of Azure Data Factory from Dev to Prod environments, improving deployment reliability.
- Used Azure Repos and ARM Templates for automated infrastructure deployment.

Chatbot Python Flask Hosting on IIS

- Configured and deployed a Python Flask-based chatbot on Windows Server (IIS) with reverse proxy and WSGI setup.
- Used CursorAI to assist in server configuration scripting, reducing setup time and catching misconfigurations early.

Education

B.Tech – Jawaharlal Nehru Technological University, Hyderabad

Personal Details

Languages Known: English, Telugu, Hindi

Location: Hyderabad, India
